INDEX

Action current of isolated nerve fiber, effect of, on an adjacent fiber, 177
Action potentials, auditory, 73
——— ———, in medulla oblongata, midbrain, thalamus, and internal capsule, 149
Activation, motoneuron, antidromic, effect of, 9
——, orthodromic, effect of, on spinal motoneurons, 167
Activity, cortical, 1, 5, 63, 113, 117, 127, 207, 235, 295, 373, 383, 465
——, electrical, in fetal cerebral cortex, 427
——, ——, in cerebellum, 465
——, ——, inhibition of, 1, 5
——, ——, of spinal motoneurons, 9, 137
——, ——, and stimulation of cerebral cortex, 383
——, ——, cerebral, and diencephalic stimulation, 1
——, ——, ——, and cortical stimulation, 5
——, ——, ——, after diencephalic destruction, 113, 117
——, ——, corticothalamic, reverberating circuit, 235
——, spontaneous, of single cerebellar units, 465
Ades, Harlow W. and Brookhart, John M. The central auditory pathway, 189
Afferents, spinal, termination in inferior olive, 431
After-potential, of motoneurons, 9
——, spinal motoneuron, after antidromic activation, 5
——, ——, ——, after orthodromic activation, 157
Amador, Luis V. See Sugar, Oscar, 229
Areas, cortical, 127, 137, 383
——, ——, visual, 277

Babkin, Boris Petrovitch (obituary), 389
Babkin, B. P. and Kite, W. C., Jr. Central and reflex regulation of motility of pyloric antrum, 321
—— and ——. Gastric motor effects of acute removal of cingulate gyrus and section of brain stem, 335
—— and Speakman, T. J. Cortical inhibition of gastric motility, 55
Baboon, delayed response following frontal lobotomy, 373
Bach, L. M. N. Effect of bulbar facilitation and inhibition on peripheral reflex inhibition, 259
——. See Thompson, W. C., 455
Barnard, John W. and Carpenter, Wallace. Lack of regeneration in spinal cord of rat, 223
Behavior, after lobotomy, 373
——, after motor cortex lesions, 137
——, circling, biochemically induced, 269
Berry, C. M., Karl, R. C., and Hinsey, J. F. Course of spinothalamic and medial lemniscus pathways in cat and rhesus monkey, 149
Blackstad, Th. See Brodal, Alf, 431
Blood pressure, after cerebral cortex stimulation, 409
——, ——, after temporal lobe stimulation, 65
——, ——, after trigeminal neurotomy, 409
Brodal, Alf, Walberg, Fred and Blackstad, Th. Termination of spinal afferents to inferior olive in cat, 431
Brookhart, John M., Moruzzi, G., and Snider, Ray S. Spike discharges of single units in the cerebellar cortex, 465
——. See Ades, Harlow W., 189
Brooks, C. McC., Downman, C. B. B., and Eccles, J. C. After-potentials and excitability of spinal motoneurones following antidromic activation, 9
——, ——, and ——. After-potentials and excitability of spinal motoneurones following orthodromic activation, 157

Carlson, A. J. Boris Petrovitch Babkin, 389
Cat, after-potentials in spinal motoneurons, 9, 157
——, antidromic activation, 9
——, autogenic muscle governors, 351
——, biochemically induced circling, 269
——, central auditory pathway, 189
——, chronic focal hyper-irritability of sensory nervous system, 215
——, cingulate stimulation, 207
——, connections of hypothalamus and medulla, 455
——, cortex, cerebellar, spike discharges in, 465
——, cortically induced movement and vestibular nerve section, 295
——, corticothalamic reverberating circuit, 235
——, decerebrate, inhibition of knee jerk by tendon spindles of crureus, 343
——, dorsal column conduction, 39
——, electronarcosis, 1, 5, 113, 117
——, elementary vestibulo-ocular reflex arc, 395
——, excitability of spinal motoneurons, 9, 157
——, peripheral reflex inhibition, 259
——, response of visual cortex, 305
——, spinothalamic and lemniscus pathways, 149
——, supracallosal anterior cingulate gyrus, stimulation and strychninization of, 207

——, termination of spinal afferents in inferior olive, 431
CHANG, Hsiang-Tung. The repetitive discharges of corticothalamic reverberating circuit, 235
——, and KAADA, Birger. An analysis of primary response of visual cortex to optic nerve stimulation in cats, 305
CHAPMAN, William P., LIVINGSTON, Kenneth E., and POPPEN, James L. Effect upon blood pressure of electrical stimulation of tips of temporal lobes in man, 65
Clarke's column, impulses in, 39
Cochlea, action potentials in, 73
——, threshold of response in, 73
COLE, J. See GLEES, P., 137
Conduction, postsynaptic, in myotatic afferent fibers, 39
——, presynaptic, in myotatic afferent fibers, 39
——, velocity in dorsal columns, 39
Connections, corticocortical, 229
Contraction, muscle, reflex self-regulation of, 351
Cortex, cerebellar, spike discharges in, 465
——, ——, spike discharges of single units of, 465
——, cerebral, and gastric motility, 55, 321
——, ——, areas, connections of, 127
——, ——, inhibition of, 1, 5, 113, 117
——, ——, motor lesions in, 137
——, ——, onset of activity in fetal life, 427
——, ——, stimulation after vestibular nerve section, 295
——, ——, —— of, 5, 13, 117, 295, 409
——, ——, —— of, and blood pressure responses, 409
——, ——, visual areas I and II, 277
——, motor, recovery after repeated lesions in, 137
——, orbito-mesial-temporal, connections of, 127
——, ——, stimulation of, 383
——, visual, response to stimulation of, 305
Crista, correlation of, with extra-ocular muscle, 395

DAVIS, H., GERNANDT, B. E., and RIESCO-MACCLURE, J. S. Threshold of action potentials in ear of guinea pig, 73
DEERING, I. D. See MCCOUCH, G. P., 343
Delayed response, factors affecting, after frontal lobotomy, 373
Diencephalon, destruction of, and cortical electrical activity, 113, 117
——, inhibition after stimulus to, 1, 5, 113, 117
——, stimulation of, and cortical electrical activity, 1
Di-isopropyl fluorphosphate (DFP), effect of, on circling behavior, 269
Discharges, repetitive, and corticothalamic reverberation, 235
——, spike, of single cerebellar units, 465
Dog, central and reflex regulation of motility of pyloric antrum, 321
——, cortical inhibition of gastric motility, 55
——, elementary vestibulo-ocular reflex arc, 395
——, gastric motility, effects of removal of cingulate gyrus and brain stem section, 335
——, inhibition, cortical, of gastric motility, 55
Dorsal column, 39
——, ——, group I muscle afferents in, 39
DOWNMAN, C. B. B. See BROOKS, C. MCC., 9, 157
DUNSMORE, Rembrandt H. and LENNOX, Margaret A. Stimulation and strychninization of supracallosal anterior cingulate gyrus, 207
——. See LENNOX, Margaret A., 383
——. See PRIBRAM, K. H., 127

Ear, action potentials in, 73
——, central auditory pathway, 189
ECCLES, J. C. See BROOKS, C. MCC., 9, 157
Electrocorticogram. See Activity, electrical, cerebral.
Electronarcosis, 1, 5, 113, 117
Epilepsy, cortical, after diencephalic destruction, 117
EPSTEIN, Joseph A. See LENNOX, Margaret A., 383
ESSIG, Carl F., HAMPSON, John L., MCCAULEY, Alice, and HIMWICH, Harold E. An experimental analysis of biochemically induced circling behavior, 269
Excitability, motoneuron, during muscle contraction and stretch, 351
——, nerve fiber, strength-duration curve, 289
——, spinal motoneuron, after antidromic activation, 5
——, ——, ——, after orthodromic activation, 157
Eye, cortical visual areas, 277
——, extra-ocular muscles of, 395
——, retinal induction and optical illusion, 413

Facilitation, effect of myanesin on, 89
Factors, physical and pharmacological, affecting delayed response, 373
Fibers, afferent, intramedullary impulse velocity in, 39
——, auditory, site of decussation of, 189
——, group I afferent, conduction of, 39

——, myotatic afferent, dorsolateral tract projection of, 39
——, nerve, afferents from muscle, termination of, 39
——, ——, single, excitation of, 177
——, ——, ——, effect of NaCl on, 177
——, ——, ——, membrane resistance of, 177
——, spino-olivary, termination of, 431
Fissure, Rolandic, corticocortical connections of, 229
FLEXNER, Louis B., TYLER, David B., and GALLANT, Leonard J. Biochemical and physiological differentiation during morphogenesis. X. Onset of electrical activity in developing cerebral cortex of fetal guinea pig, 427

GALLANT, Leonard J. See FLEXNER, Louis B., 427

——. See GUALTIEROTTI, T., 117
MARZORATI, A. See GUALTIEROTTI, T., 5, 117
——. See MARTINI, E., 1, 113
Medulla oblongata, connections with hypothalamus, 455
Mephenesin. See Myanesin.
Monkey, biochemically induced circling behavior, 269
——, cingulate stimulation, 207
——, corticocortical connections, 229
——, corticothalamic reverberating circuit, 235
——, medial lemniscus and spinothalamic pathways, 149
——, motor cortex lesions and motor functions, 137
——, orbito-fronto-temporal, limbic and hippocampal areas, cortical connections of, 127
——, posterior central sulcus, corticocortical connections of, 229
——, spinothalamic pathways and medial lemniscus, 149
——, stimulation of cerebral areas and electrocorticograms, 383
——, supracallosal anterior cingulate gyrus connections, 207
——, trigeminal neurotomy and blood pressure responses from cerebral stimulation, 409
Morphogenesis, biochemical and physiological differentiation during, 427
Motility, gastric, 321, 335
——, ——, after cingulate gyrus removal and brain stem section, 335
——, pyloric, nervous control of, 321
MOTOKAWA, Koiti. Field of retinal induction and optical illusion, 413
Motoneurons, after-potentials of, 9, 157
——, ——, after orthodromic activation, 157
——, excitability of, 9
Motor area, stimulation of, 113, 117
——, ——, ——, after diencephalic destruction, 117
Movements, circling, induced by DFP, 269
Muscle afferent nerve impulses, 39
——, contraction of, and autogenetic inhibition, 351
——, crureus, tendon spindles of, 343
——, extra-ocular, correlation of, with crista, 395
——, gastrocnemius, autogenetic governors of, 351
Myanesin, site of action of, 89

Nerve, optic, stimulation of, 305
——, saphenous, stimulation of, 149
——, sciatic, stimulation of, 149
——, strength-duration curve for excitation of, 289
——, trigeminal, section of, and blood pressure responses, 409
——, vestibular, effect of section of, 295
Nervous system, hyper-irritability of, 215
Neurotomy, trigeminal, and blood pressure responses, 409

Olive, inferior, termination of, 431

Pathway, central auditory, 189
——, conducting, in visual system, 305
——, cortico-ponto-cerebellar, influence on cerebellar spike discharge, 465
——, dorsal spino-cerebellar, 431
——, multisynaptic, effect of myanesin on, 89
——, spino-cerebellar, influence on cerebellar spike discharge, 465
——, spino-olivo-cerebellar, 431, 465
——, spinothalamic and lemniscus, 149
Pons, lesions of, responses after, 395
POPPEN, James L. See CHAPMAN, William P., 65
Potentials, after. See After-potentials.
——, rhythmic, from fetal cortex, 427
——, spike, of single units from cerebellar cortex, 465
PRIBRAM, Karl H. Some physical and pharmacological factors affecting delayed response performance of baboons following frontal lobotomy, 373
